

Job Title: Senior Software developer

→ The Job

TrackMan A/S is looking for two skilled and dedicated developers for the rapidly growing product development group. The company's software platforms handle the basic Real-Time calculations on radar measurements and the communication of these, both to in-house developed GUI-applications and to TV transmissions. All applications are local, and are directly integrated with one or more TrackMan™ radar units.

TrackMan A/S has expanded to cover several sports in addition to golf, including baseball and cricket. For each sport, their products include online/web functionality.

You will be a part of the team of developers within the core area of the company and have big influence upon product design and development etc. The positions are newly created and can, to some extent, be tailored to match the right candidate.

→ You

TrackMan A/S expects that your working style is dynamic and energetic. You are performance oriented, responsible and enjoy working both independently as well as with other people. You thrive in a small organization where it is expected that you will be up and running quickly and naturally take part in the technical sparring across departments. Your qualifications are expected to lie within the following requirements:

You have an education in engineering, computer science similar and have solid experience with databases and object-oriented design and development.

Experience with technologies such as:

- C#, .Net
- MS SQL (T-SQL), LINQ, WCF
- Visual Studio 2008/2010
- WPF, Silverlight, ASP.NET/HTML
- You have understanding of aspects of client/server communications and have developed GUI front ends
- Knowledge of UML, Patterns and Unit testing is an advantage
- You are the best at your area of specialization and have at least 5 years of relevant work experience

→ About TrackMan A/S

TrackMan A/S develops, produces and sells 3D measurement equipment for use in sports. TrackMan uses Doppler radar technology, is the only system in the world that can measure a golf ball's entire trajectory from launch until landing +350 m away!

TrackMan™ has become the industry standard in dynamic golf ball and club measurement. Customers include PGA and European Tour Professionals, the USGA and R&A, equipment manufacturers, club fitters, retailers and many more.

TrackMan is successfully entering other sports, as well as developing products that will make the TrackMan™ technology accessible to the average golfer. At TrackMan A/S you will be a part of a competent and ambitious young team where we aim high to secure the world's best measurements. You will be working with ground breaking technology and play a part in developing the standards of the future.

→ TrackMan A/S offers you

Working for TrackMan A/S is exciting and educational. As a member of the TrackMan™ team, you will be working closely with players such as Tiger Woods and other stars on the PGA Tour, the European Tour, and in other professional sports.

The demands of this position are matched by a challenging position in an interesting and successful company that uses the newest technology the market has to offer. TrackMan A/S has a good social environment where there is room for professional ambitions and where employees are met with high expectations.
